SUMMARY

Frontend Developer with experience building industrial-grade SCADA and IoT dashboards for Siemens-integrated infrastructure systems. Specialized in developing real-time monitoring solutions, data-intensive interfaces, and geospatial visualizations using Next.js, React, Vue.js, and TypeScript. Experienced in PLC tag mapping, SCADA architecture, and backend services, enabling end-to-end development of smart building and industrial monitoring platforms.

WORK EXPERIENCE

Frontend Developer

August 2024 - Present

EMS – Engineering Management Systems | Cairo, Egypt

- Designed and developed 5+ production grade SCADA and IoT dashboards using React and Vue.js for Siemens integrated industrial facilities.
- Built real time visualizations for pump heatmaps, KPI analytics, flow trends, and 3D scatter charts using ECharts GL.
- Developed a 3D geospatial infrastructure map with Cesium.js and OpenStreetMap integration for real-time station monitoring.
- Integrated AI-generated flow and pressure predictions into operational dashboards.
- Collaborated with engineers on PLC integration, IEC 61131-3 logic, and SCADA system architecture.
- Improved dashboard performance and user experience for mission-critical monitoring systems.
